Notes & Details

This Waterloo pre-rinse faucet adapter allows you to easily attach an add-on faucet to your existing pre-rinse unit. To install it, simply thread it onto the add-on faucet's riser, and then thread the pre-rinse riser into the top of the adapter. A 12mm hex key / Allen wrench (sold separately) is required to tighten the adapter.

This adapter is required to install a Waterloo add-on faucet on any Waterloo pre-rinse faucet that did not come standard with an add-on faucet. It can also be used to install a Waterloo add-on faucet on any pre-rinse faucet with a 1/2" riser connection.
