## Notes & Details

Optimize your washing station with the Waterloo wall-mounted low profile pre-rinse faucet with 8" centers and spray valve. This Waterloo wall-mounted pre-rinse faucet is perfect for rinsing excess food and sauces off of your dishes prior to running them through your commercial dish machine. A quality pre-rinse unit is vital to any dish room, removing the heaviest soil deposits so that dishes come out clean and ready to use. Waterloo products provide the industry-leading quality you expect. With heavy chrome-plated brass faucet bodies, ceramic cartridges engineered for durability, and certifications from a wide range of national and local regulatory agencies, you can install Waterloo products with confidence.

This unit is intended for applications that provide water for warewashing and janitorial or utility use. A 23" long flexible hose gives you plenty of reach to deliver water where you need it, letting you handle glassware and dinnerware, or bulky items like pots and pans. Installed on 8" centers, this faucet also has a heavy-duty body that can withstand long-lasting use. The spray valve delivers a flow rate of 1.15 GPM, giving you the power needed to blast away food debris while being easy on your water bill. This faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed, removing the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. Great for height-restricted installations, this low-profile pre-rinse unit comes with a 10" riser and a 6" wall bracket to help secure the unit to the wall for added stability. Required installation kits are sold separately.
