PATENTED FOOD SAFETY HOOK*
FOR SANITARY TRANSPORT & STORAGE

One of the most common causes of food-related illness is cross-contamination, or the transfer of harmful bacteria from one food product to another.

Using color coded cutting boards for different foods is a way of preventing cross contamination. White Cutting Boards with Colored Saf-T-Grip® help you keep track of which cutting boards are reserved for which types of food, so that you're less likely to cut lettuce on the same board you cut raw poultry. Keeping the tradition of San Jamar's quality and durability of our white cutting boards and integrating color coded anti-slip grips to provide the best of both worlds. Tradition and Innovation.
