

XTREMEDRY® PRO DIY

PROFESSIONAL DRYING SOLUTION

What is the XPOWER XTREMEDRY® Solution?

The XTREMEDRY® solution is a 3-stage process that starts with our leading LGR dehumidifier, which is capable of reducing the relative humidity level down to 25%. The ability to produce a desert-like environment in the room pulls bound moisture out of difficult-to-dry materials. Our air movers work in concert to lift moisture off the surfaces in the room for the LGR dehumidifier to remove. All the while, our commercial air scrubbers restore healthy air quality to the job site by removing contaminants with advanced 3 to 4-stage filtration technology.

GOLDEN WINDOW

to prevent mold growth

Use the equipment within 24 hrs of the water damage occurring.

HUMIDITY LEVEL

for an XTREMEDRY® Environment

Our LGR dehumidifier can reduce relative humidity down to 25% to pull bound moisture out of tough-to-dry materials.

UNINTERRUPTED

drying process

Run our Pro-DIY tools for 24 uninterrupted hours to begin the process and get professional results.

Water Damage Accidents

Water Overflow

Burst Water Pipe

Broken Sprinkler

HVAC Leaks

High Humidity Levels

HIGH R.O.I.

Use our professional grade tools with a commercially proven drying method at a fraction of the cost of calling the restoration companies.

24/7 Preparedness

Take immediate action and start a professional drying process as soon as the water damage occurs. Why wait to call a contractor and fill out insurance claims when water damage is spreading through your facility?

Prevention

Our industry-leading solution can be used as part of a preventative program in high humidity areas to remove remnants of moisture that can accrue and cause problems down the line.
