

# Calculating Amps, Volts, & Watts

As long as you know two out of three, you can calculate amps, watts, and volts with these easy formulas:

## Watts = Amps x Volts

Multiply amps and volts to calculate watts.

Example: 10 Amps x 120 Volts = 1200 Watts

---

## Amps = Watts ÷ Volts

Divide watts by volts to calculate amps.

Example: 2400 Watts ÷ 120 Volts = 20 Amps

---

## Volts = Watts ÷ Amps

Divide watts by amps to calculate volts.

Example: 2400 Watts ÷ 10 Amps = 240 Volts
